of a vaccine under indent one of point 4 within a period of no more than 180 days since receiving a positive PCR test result or from the onset of symptoms; The person is protected as of the day of vaccination.

A **PCR test** is deemed to be valid if performed in an EU member state, a Schengen Area country, Australia, Bosnia and Herzegovina, Israel, Turkey, Canada, New Zealand, Russia, Serbia, the UK or the US. If a PCR test is performed in a country other than those listed above, it is deemed to be valid if it meets all of the following conditions:

it contains at least the same data set as a PCR test issued in an EU member state or a Schengen Area country: name, surname, the person's unique identifier (personal identification number, health insurance number, number of passport or another document issued by that country, date of birth or other similar identifier), data on the test type (producer, date and time of taking the swab), data on the issuer of the certificate, and the date of the issuing of the certificate, and has a QR code in accordance with the standards and technological systems that are interoperable with the European Digital COVID Certificate System, and allows the authenticity, validity and integrity of the certificate to be verified in the same way as a European Digital COVID Certificate.

A **rapid antigen test** is deemed to be valid if performed in an EU member state, a Schengen Area country, Australia, Bosnia and Herzegovina, Israel, Turkey, Canada, New Zealand, Russia, Serbia, the UK or the US. If a rapid antigen test is carried out in a country other than those listed above, it is deemed to be valid if it meets all of the following conditions:

it contains at least the same data set as a rapid antigen test issued in an EU member state or a Schengen Area country: name, surname, the person's unique identifier (personal identification number, health insurance number, number of passport or another document issued by that country, date of birth or other similar identifier), data on the test type (producer, date and time of taking the swab), data on the issuer of the certificate, and the date of the issuing of the certificate, and has a QR code in accordance with the standards and technological systems that are interoperable with the European Digital COVID Certificate System, and allows the authenticity, validity and integrity of the certificate to be verified in the same way as a European Digital COVID Certificate.

The decree does not explicitly prescribe the language of certificates. In addition to certificates in Slovenian, valid certificates include those in

the languages of the national minorities (Italian, Hungarian) in bilingual areas and the languages of countries recognised by mutual agreements or arrangements (Hungarian, Serbian). In order to avoid possible uncertainty at the border, we suggest that foreigners have their vaccination certificates translated into English or German.

A person who does not provide one of the above is referred to quarantine at home for a period of 10 days. In the case of a **foreigner who is not resident in Slovenia**, they may enter Slovenia and are sent to quarantine at home for 10 days if they provide unequivocal proof that they have a guaranteed place in which to undergo quarantine, otherwise entry to Slovenia will not be permitted.
